# 1. Safety and usage information

To protect you and your friends from harm or to protect your device in order to avoid damage, please read all of the following information before using your device.

## 1.1 Security Warning

### **Put the device in the place where out of the reach of children and pets**

The equipment and spare parts away from children and pets out of the reach. Children and pets may swallow small parts choking or danger.

**Protect your hearing:** A long time in a high volume environment may damage human hearing. Recommend the use of the call or the required minimum volume setting music.

**Carefully install the device:** Make sure the related equipment installed in the safety vehicle. Equipment and accessories must not be placed on or near the air bag deployment area. Improperly installed wireless equipment when air bags inflate rapidly, can cause serious damage.

### **Avoid interference with pacemakers**

- The rugged tablet may interfere with pacemakers, so do not use the device where near your pacemaker between 15 cm range.
- If you must use the device, keep at least 15 cm from the pacemaker.
- To minimize interference with the pacemaker, set the body with his back to the pacemaker using the device

- ✧ **Turn off your device In potentially explosive environments :** Do not use the machine at gas station or near flammable materials or chemicals. When in warning signs or instructions off, please shut off the device. The device could cause an explosion or fire in the fuel or chemical storage and transfer areas or blasting areas.
- ✧ **Handle and dispose of batteries and chargers**
- ✧ Equipment designed specifically for use only batteries and chargers. Incompatible batteries and chargers can cause serious injuries or damage to equipment

Do not put batteries and the device in or above the heating equipment. Such as microwave oven, oven and radiator for it may cause explosion.

Do not extrude or impale the batteries. And keep away from outside high voltage. Or it will lead to short circuit inside and overheating.

Please do not use the device when the screen is broken or damaged: **Broken screen may cause your hands and face hurt. You can take your device and change the screen at the after-sales repair point.**

## **1.2 Safety Precautions**

**Safety traffic comes first: do not use your device when driving. And follow all the rules about the usage of tablet when driving. If possible, use HFP mode to make sure of safety. Following all the security warnings and regulations: follow the regulations about the limited usage of the tablet in some**

**areas.**

**Turn off when it near to the medical facility: The tablet may effect the medical facility in hospital or health institution. please follow the rules and doctors directions.**

**Turn off or cut down the network when you are in plane: device may effects the salinity plane. Please follow the rules of airplane company. And turn off your device or cut down the network according to the airman.**

**Avoid interference with other electronic devices: the radio frequency signal from the tablet may effect unshield electronic equipment such as Pacemaker, hearing aid, medical equipment and other household or automotive electronic equipment. To avoid the interference problem, please contact with electronic equipment manufacturer.**

### **Handling equipment properly**

Do not disassemble the equipment to prevent electric shock hazard.

- Do not paint the tablet.Oil paint can clog the device's moving parts and prevent proper operation.
- Keep a distance away the eyes of people or animals when using the tablet's camera flash or light (if it has the devices).
- Devices and memory cards may be affected by magnetic fields and damage. Do not use a carrying cases and accessories with magnetic shell, do not let the tablet

long-term contact with the magnetic field.

### **Protect the battery and charger from damage**

Avoid exposing batteries to very low or very high temperatures (below -20 °C or above 65 °C) place.

Extreme temperatures can cause the device to deform, and reducing the charging capacity and shortening the tablet and the battery life.

Prevent batteries from contacting metal objects, as this may make the battery "+" and "-" pole connected, resulting in temporary or permanent damage to the battery.

Never use a damaged charger or damaged battery.

## **1.3 Important usage information**

**Using the device in the normal position: Do not touch the tablet's built-in antenna. Contact with the antenna will reduce the call quality or cause the tablet to send more than the required radio frequencies.**

### **Ensure maximum battery and charger life**

Battery charge shall not last more than a week, since overcharging may shorten battery life.

Be recharged before use the battery if it left unused for a long time, battery will gradually discharge.

Disconnect the power when the charger stopped work.

Use battery only for its intended purpose.

### **Handling SIM cards and memory cards**

Do not remove the card when tablet is transferring or accessing the information, or it may cause data loss or damage the tablet

and memory card.

Protect cards from strong shocks, and interference from static electricity and electromagnetic or other devices.

Frequent writing and erasing file will shorten the life of the memory card.

Do not touch the golden compactor or terminal with your fingers or metal objects. If slot is dirty, wipe the card slot with a soft cloth.

**Ensure to use emergency services: in some areas or circumstances, tablet may not complete emergency call.**  
**Prior to traveling in remote or undeveloped areas, plan an alternate method of contacting emergency services staff.**

## **1.4 Disclaimer**

For any pre-loaded or bundled games, applications procedure form this product include the relevant files (hereinafter referred to as software), and content, services and related documents, including but not limited to any images, photographs, animation, video, audio, music, text which obtained by audio-visual materials from the product , (hereinafter referred to as service) will be in charged by related software / network operators (hereinafter referred to as the provider) is responsible for its legitimate, true and accurate, by the provider to ensure that no violation of national laws, regulations, public ethics and no invasion of rights from any third party. Providers to ensure the quality of the provided software and service, the security of user information and network, All problems, or other problems caused by the use of all the aforementioned software or services resulting from this product for users to install / use the software or use the services

## 5、Equipment maintenance

The tablet is a high-precision electronic product, please careful maintenance. The following suggestions can help you to maintain the tablet, to extend the life of the tablet:

The tablet and their accessories should be placed out of reach of children.

Do not place the phone on the temperature is too high. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt plastic shell phone.

Do not place the phone on the temperature is too low. Otherwise, when the temperature rises to the normal temperature of the phone, the moisture will be generated internally, it will damage the phone electronic circuit boards.

Do not use chemicals, cleaning solvents or strong detergents to clean the phone, should use a soft cloth dampened with soapy water gently scrub.

Do not use paint graffiti cell phone to avoid being stuck moving parts and

prevent proper operation.

Please use a clean, soft cloth to clean the lens. Such as: a camera lens.

When replacing the antenna, use only the supplied or specified antenna.

Use of unauthorized antennas, accessories or modify tablet may damage the tablet and violate regulations governing radio devices.

The phone does not support the operating system update; the system only comes with official support for third-party risk brush ROM, users themselves.

When mobile intelligent terminal operating system update, should ensure official authorization or operating system upgrades, such as the user to brush unofficial ROM or some third party systems may pose a security risk and security threats, and sometimes there will be some not work properly failure operation If,keep the intelligent terminal to restore factory settings or contact your nearest branch processing.
